The screenshot shows the Visual Studio Code editor with a file named `index.js` open. The code is a simple Express.js server that listens on port 3000 and responds with "Server is up and running". The terminal at the bottom shows the command `node index.js` being executed, and the output "Server is running on http://localhost:3000".

```
1  #!/usr/bin/env node
2
3  const express = require('express');
4  const app = express();
5  const port = process.env.PORT || 3000;
6
7  app.get('/', (req, res) => {
8    res.send('Server is up and running');
9  });
10
11 app.listen(port, () => {
12   console.log(`Server is running on http://localhost:${port}`);
13 });
14
```

Terminal Output:

```
PS C:\Users\User\Downloads\nodejs> cd .\day-1\
PS C:\Users\User\Downloads\nodejs\day-1> node index.js
Server is running on http://localhost:3000
```
